

AV Valve Codes

Mitral or Systemic AV valve

The systemic AV valve may be morphologically left or right and is providing the systemic support. Example: in single ventricle, Mitral atresia, the tricuspid valve is functioning as the systemic AV valve.

830= Valvuloplasty, Mitral or Systemic Atrioventricular Valve

840= Mitral or Systemic Atrioventricular Valve Stenosis, Supraaortic ring repair

850= Valve replacement, Mitral or Systemic Atrioventricular Valve MVR

860= Valve surgery, Other, Mitral or Systemic Atrioventricular Valve

2260= Valvuloplasty converted to valve replacement in the same operation, Mitral or Systemic Atrioventricular Valve

Tricuspid or non-systemic AV valve

The non-systemic AV valve is not providing the systemic support.

460= Valvuloplasty, Tricuspid or Non-systemic Atrioventricular Valve (do not use this code if tricuspid valve malfunction is secondary to Ebstein's anomaly. Use 465= Ebstein's repair

470= Valve replacement, Tricuspid or Non-systemic Atrioventricular Valve

480= Valve closure, Tricuspid or Non-systemic Atrioventricular Valve exclusion, univentricular approach

490= Valve excision, Tricuspid or Non-systemic Atrioventricular Valve without replacement

500= Valve surgery, Other, Tricuspid or Non-systemic Atrioventricular Valve

2280= Valvuloplasty converted to valve replacement in the same operation, Tricuspid or Non-systemic Atrioventricular Valve

Common AV valve

The common AV valve is the presence of one AV valve instead of 2 separate valves. This is most often in the setting of single ventricle physiology or in an un-septated valve e.g., in the setting of an unrepaired AV septal defect.

2300= Valvuloplasty, Common atrioventricular valve

2250= Valvuloplasty converted to valve replacement in the same operation, Common atrioventricular valve

2230= Valve replacement, Common atrioventricular valve

5037 = PA banding PAB + Valvuloplasty, Common atrioventricular valve

AV Valve Codes

Combo Valve Procedures that apply to more Systemic AV Valve

5012=Norwood procedure + Valvuloplasty, Systemic Atrioventricular valve + Conduit placement, RV to PA

2330= Superior cavopulmonary anastomosis Glenn or HemiFontan + Atrioventricular valvuloplasty***

2340= Fontan + Atrioventricular valvuloplasty***

***Includes: 2300 - Valvuloplasty, Common atrioventricular valve or 460 - Valvuloplasty, Tricuspid or Non-systemic Atrioventricular Valve or 830 - Valvuloplasty, Mitral or Systemic Atrioventricular Valve
